

The diagram shows a cross-section of a wire being measured. At the top, a vertical scale is labeled 'スケーラー' (Scaler). Below it, a horizontal line represents the 'ストレートエッジの端' (End of the straight edge). A green arrow points from this line down to the 'ワイヤー' (Wire). To the right, a red double-headed arrow indicates the '測定量 z' ' (Measurement quantity z'), which is the distance from the straight edge to the wire.
